</> CrewSync/README.md

CrewSync is a React-based application designed to streamline event coordination and volunteer management. The platform offers an intuitive dashboard and smart scheduling system to enhance the efficiency of event organization and volunteer tracking.

Core Features and Components

Role-based Dashboards

The application provides separate dashboards for organizers and volunteers, allowing for tailored user experiences based on their roles. This feature is likely implemented in the `Dashboard.jsx` component.

Authentication System

CrewSync implements a login and signup system,
